PROFILE

Experienced Software Engineer with a robust foundation in **Java, React.js,** and **MySQL,** specializing in the develop1nent of innovative, high-quality software solutions. Proven track record of contributing effectively as a **Full-Stack Developer** at **Accenture,** where I consistently aligned with tea1n objectives and provided support across functions, including QA, especially during critical project phases. Proficient in **agile methodologies** to deliver optimized code and achieve project targets. Enthusiastic about leveraging this expertise in a new **Software Developer** role to drive impactful results and support team success.

EMPLOYMENT HISTORY

May 2021

Software Developer, ACCENTURE

As a Full-Stack Developer at Accenture, I've worked on the development and maintenance of several software applications using **Java (Spring)** on the backend and **React.js, TypeScript, and GraphQL** on the frontend.

While my role covers both backend and frontend responsibilities, my **main interest and strength lies in frontend development**, especially with **React and TypeScript**. I've built and maintained responsive, user-focused interfaces, working closely with designers in **Figma** to bring UI/UX designs to life with **Tailwind CSS** and reusable component structures.

Throughout projects, I ensure code quality through clean, modular implementation, thorough testing, and active participation in **agile ceremonies** and **code reviews**. I've also supported QA and CI/CD efforts during critical stages to ensure stable and reliable releases.

Projects:

1. 05/2021 to current time - **Telecommunications Project**
   - Enhanced and managed an internal service management platform for an international telecommunications company.
   - Developed and maintained the frontend of a complex internal tool using React.js, TypeScript, GraphQL, and Tailwind CSS.
   - Led feature develop1nent and resolved bugs across multiple **Java-based microservices,** enabling efficient **RESTful** communication with the frontend.
   - Collaborated with designers using **Figma** to define design requirements, ensuring align1nent with project goals.
   - Supported testers during high-de1nand periods, assisting with **CI/CD** processes to maintain quality standards.
   - Facilitated solution discussions with team members and clients, using **UML diagrams** to effectively co1n1nunicate and refine proposed solutions.

EDUCATION

Sep2016 - Jul 2020

Bachelor, University of Minho

System Information Engineering

SKILLS

Frontend: React.js, React Native, TypeScript, HTML, CSS, Tailwind CSS, Figma

Backend: Java, Spring Boot, Node.js, Maven

DevOps & Tools: Git, Docker, CI/CD pipelines, Jira

Other: Agile methodologies, Code Review, UML diagrams
